

To survive in isolation
you have to create
your own universe.

LW'20

My father got me
out of my room.
He took me outside
to go beekeeping.

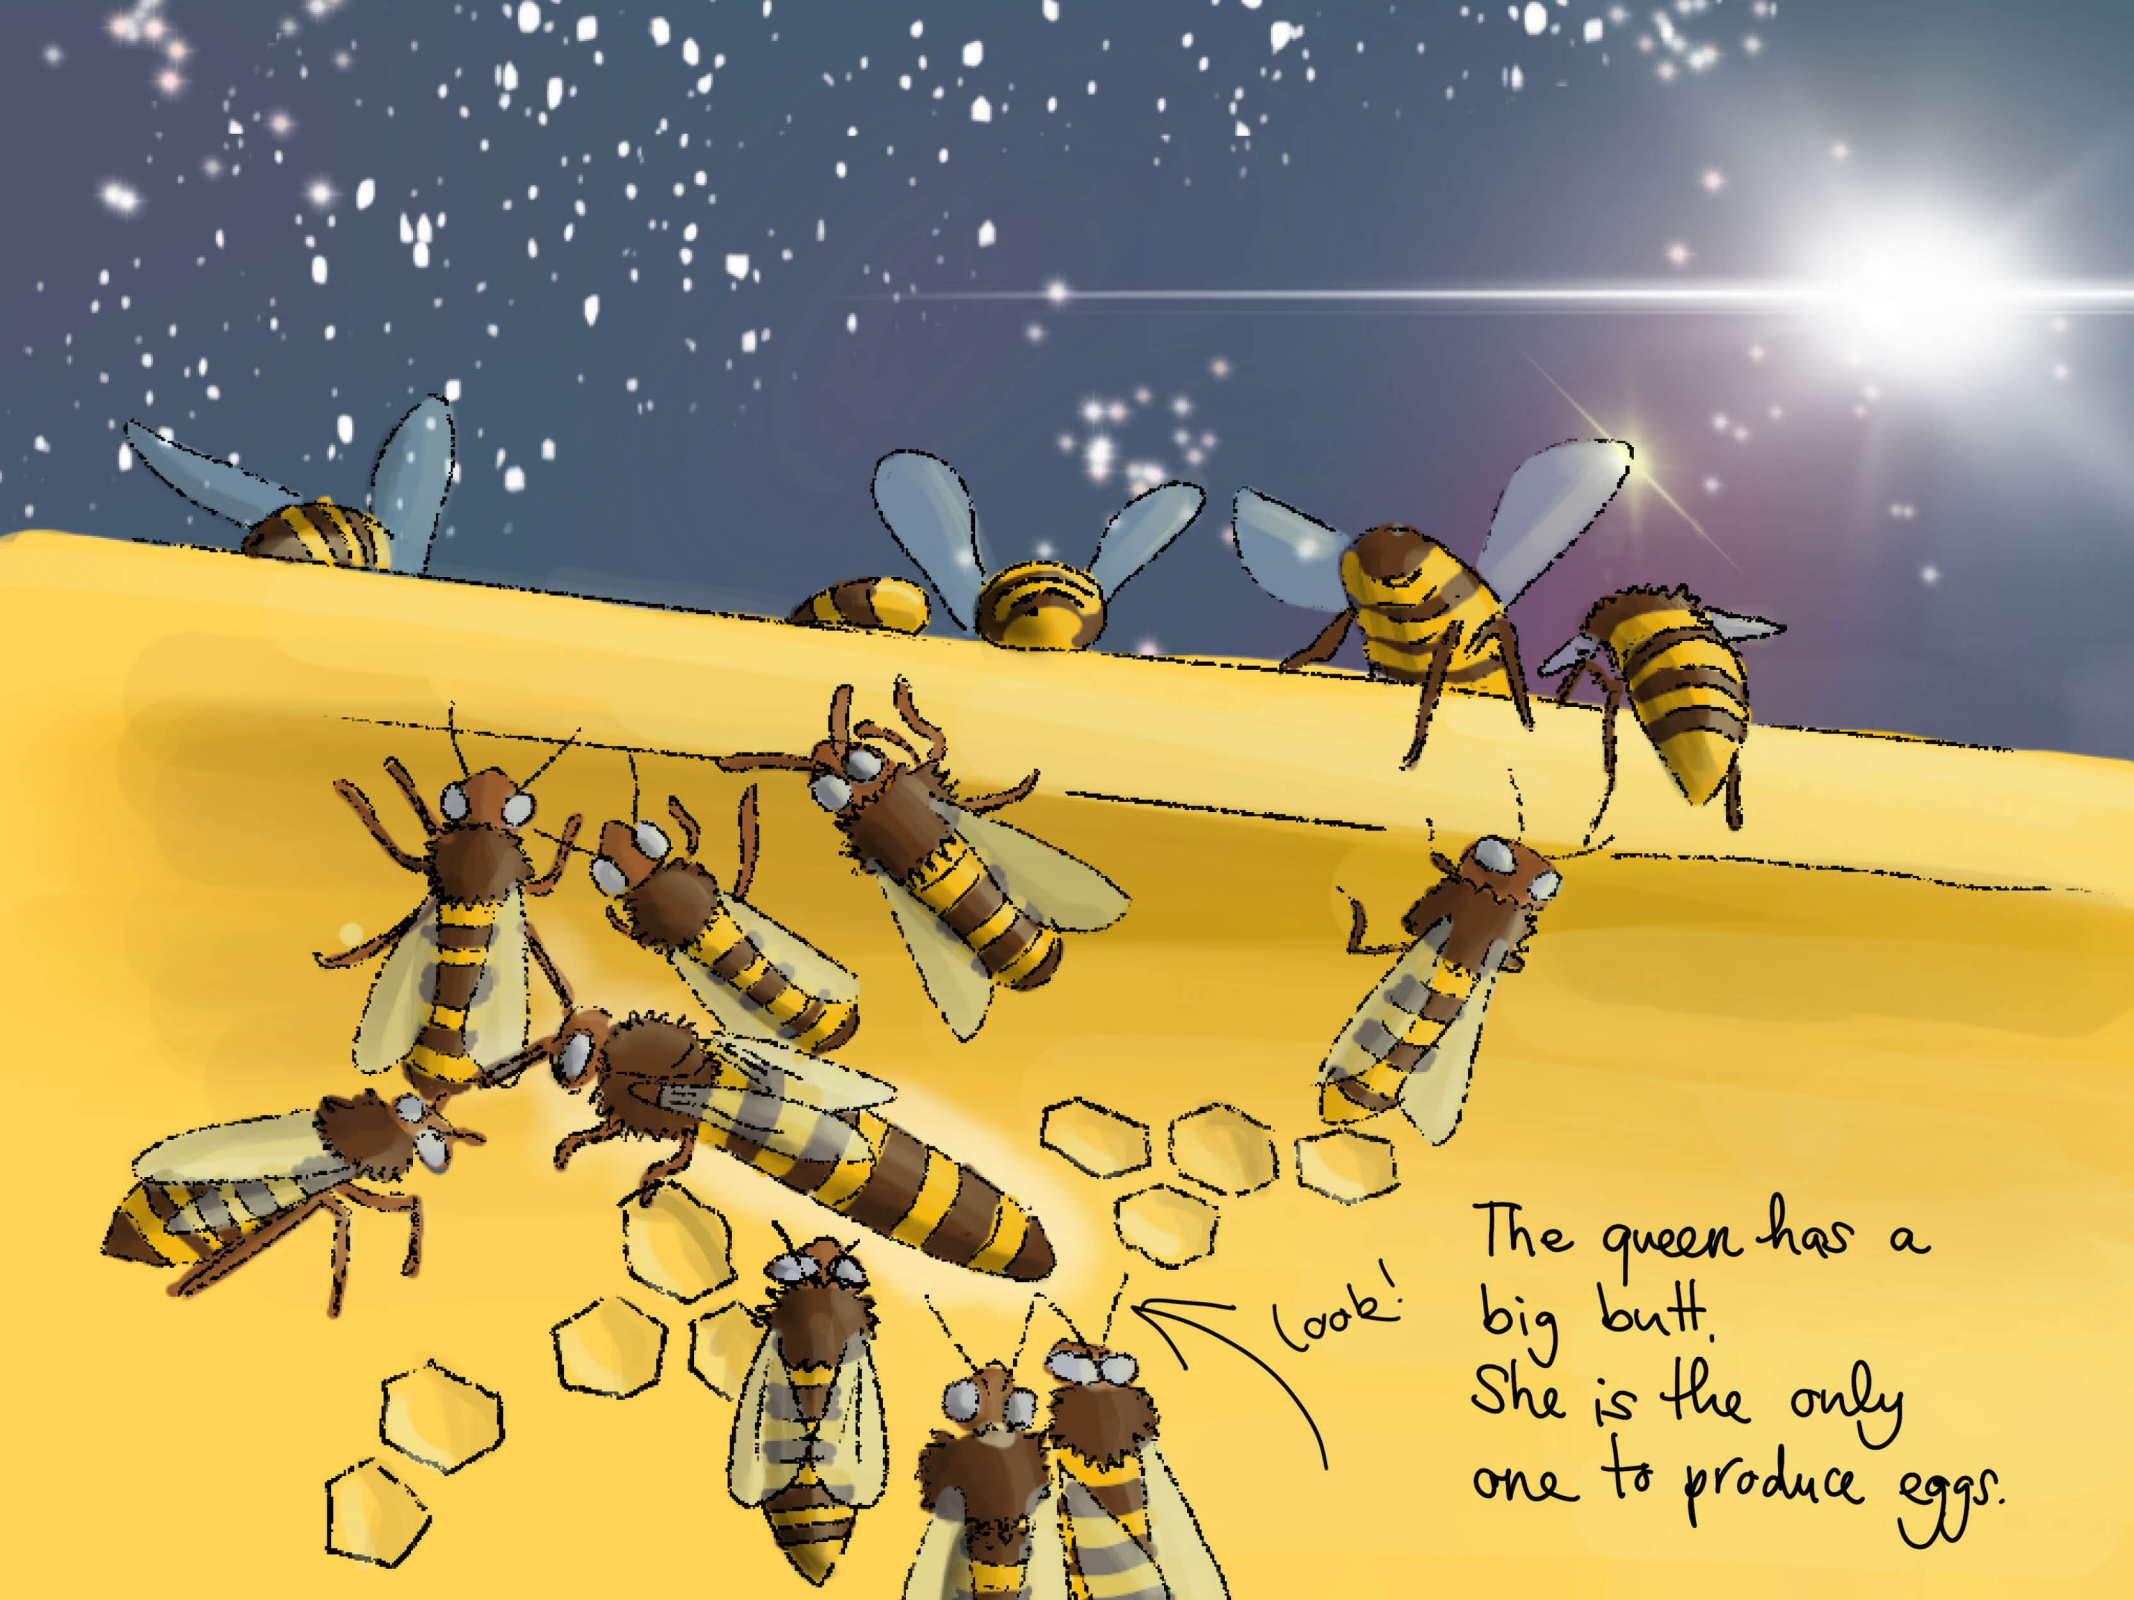

Being in Isolation
A drawn Coronareportage from
Lukrezia Walker

We have to wear protection not to get stung by the bees.

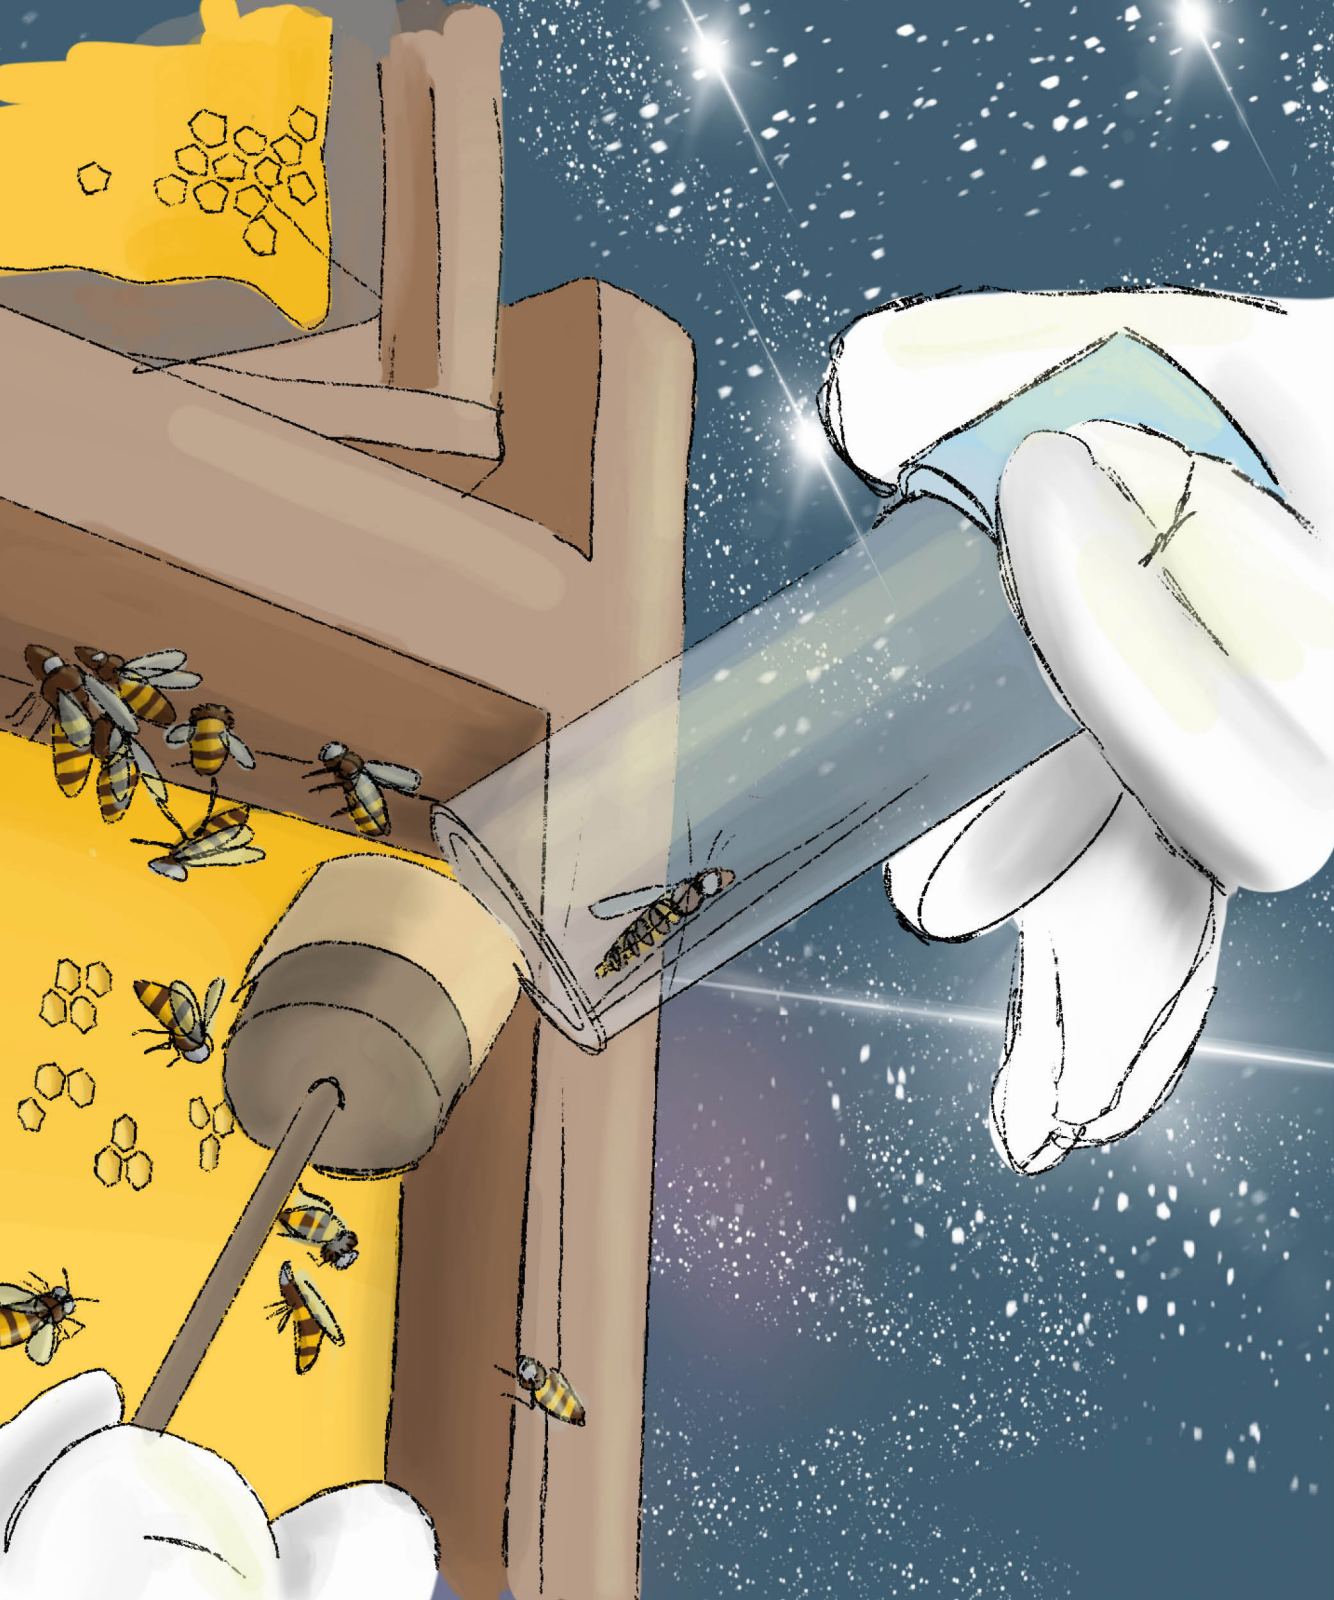

Today's mission is
to find the queen
in the hive and
to mark her.

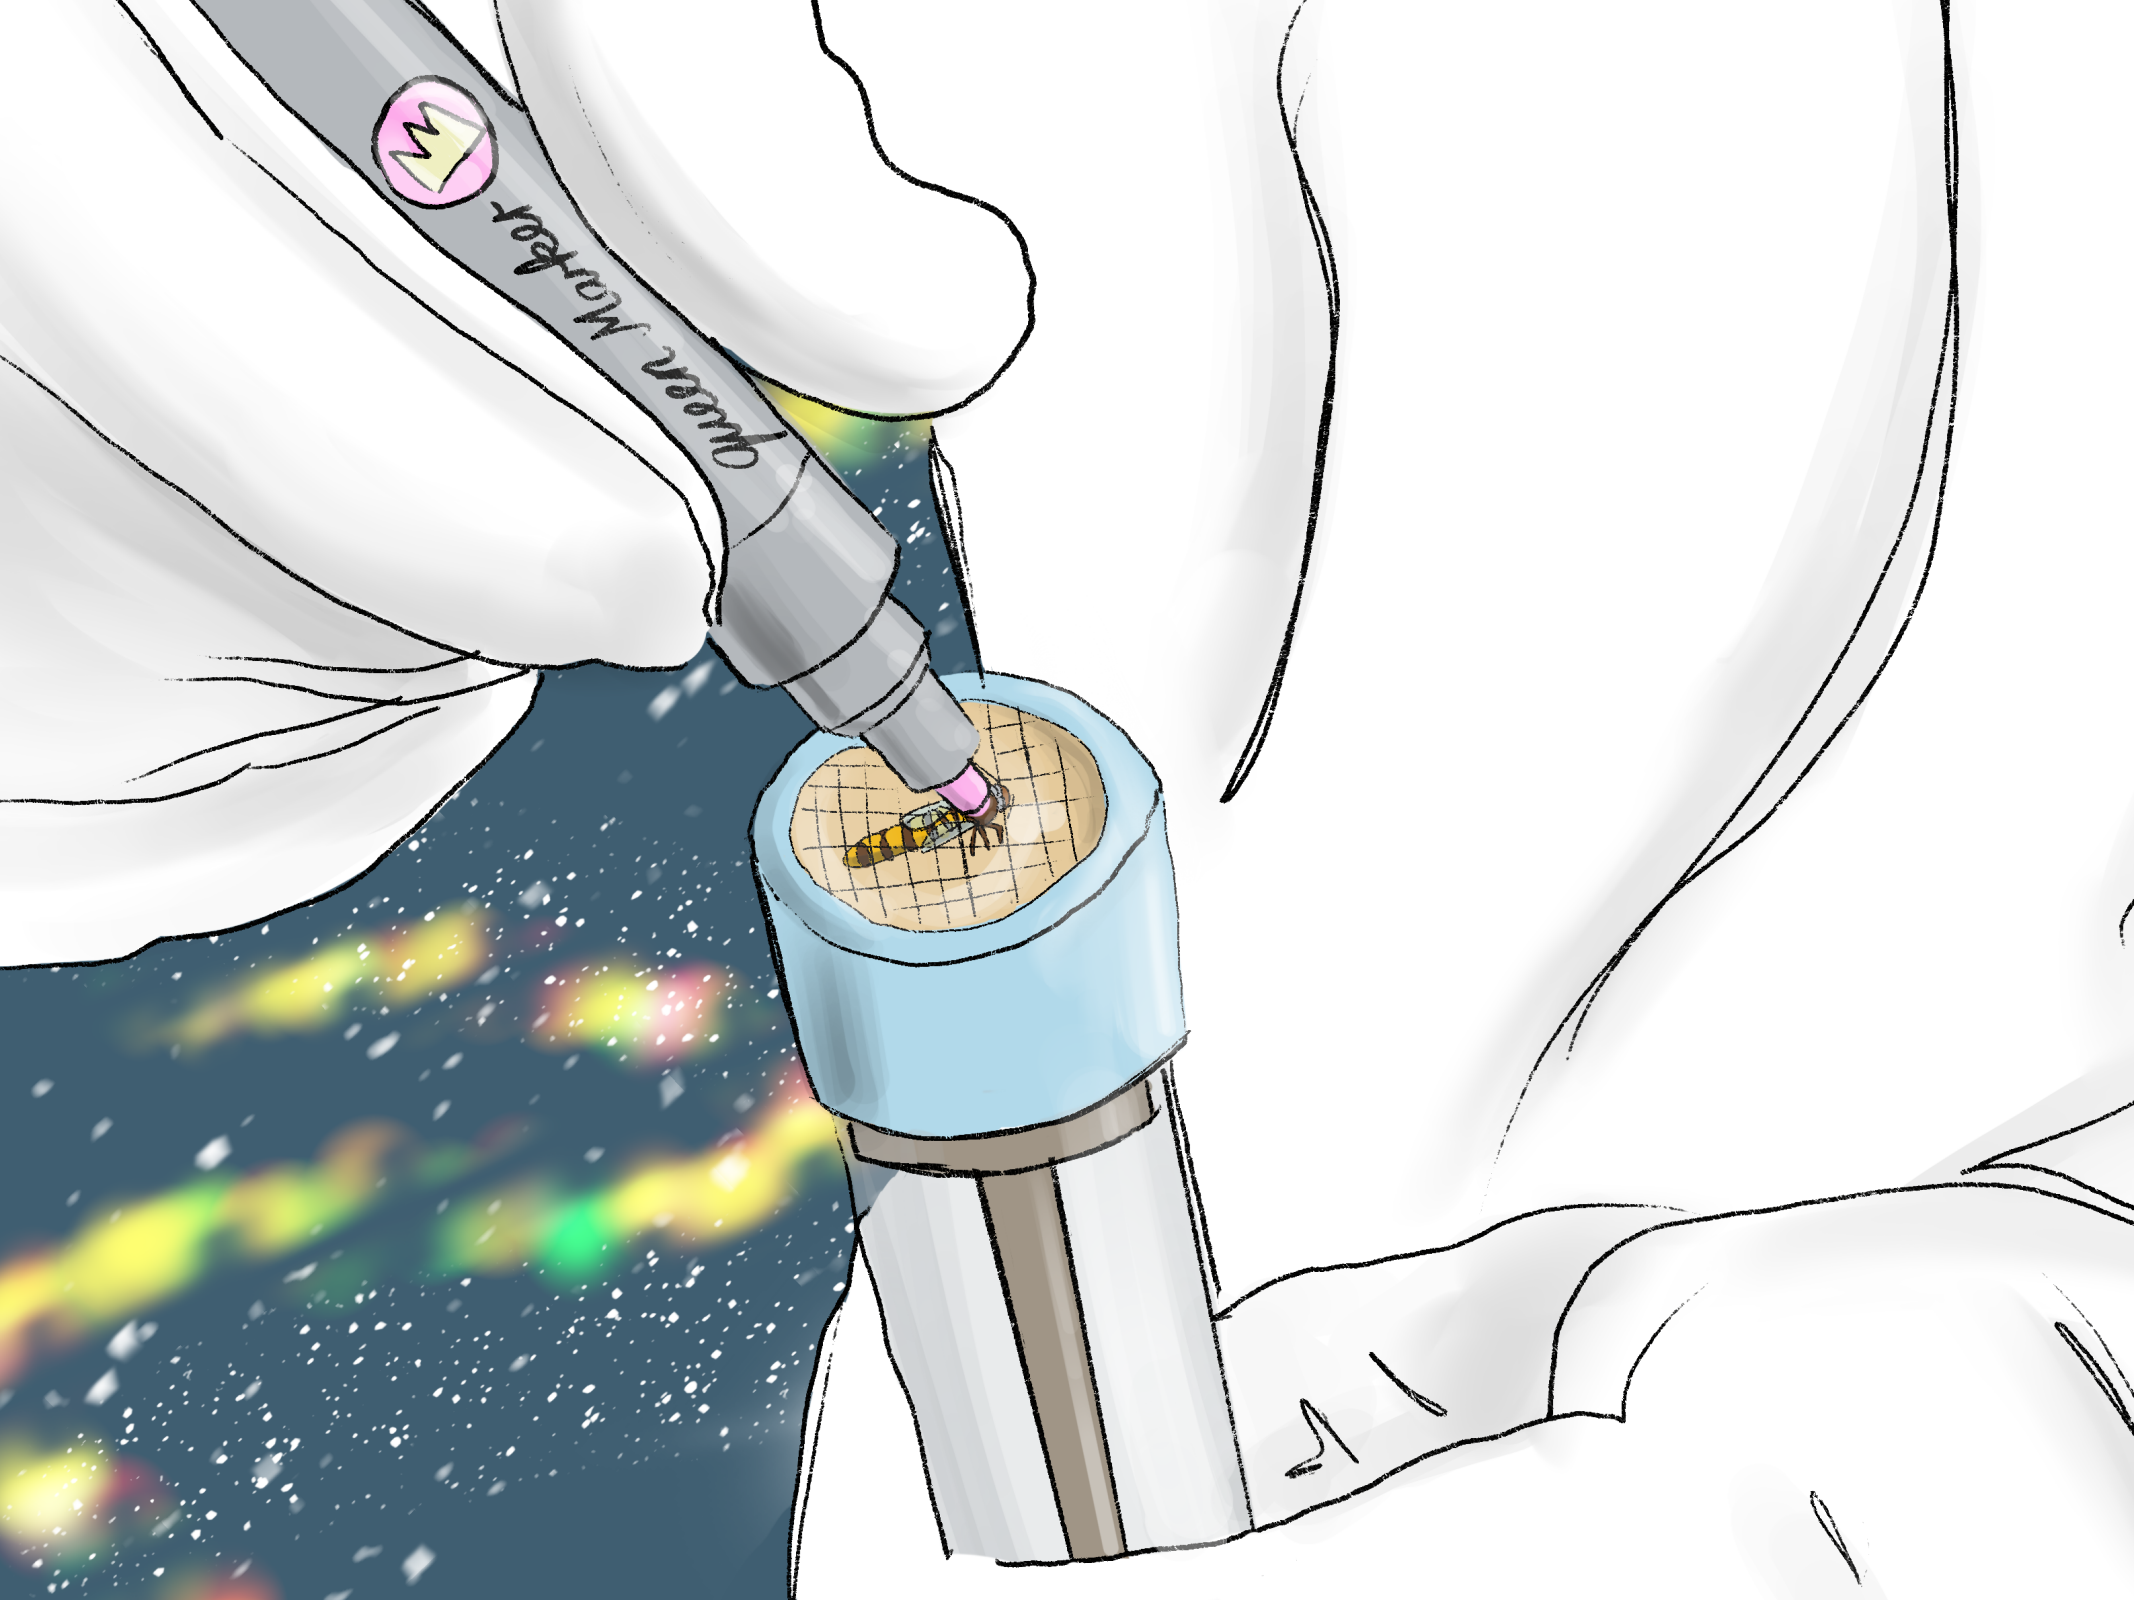

The queen has a big butt. She is the only one to produce eggs.

look!

In order to function as a bee population there has always to be ONE queen. We mark her so next time we can spot her faster.

Isolated but part
of a world.

Mission completed!
